

Objective: As part of a communication plan for Uppsala Municipality, make example posts for social media to promote applications to vocational education (healthcare, VO-programmet).

Process: Designing on Canva, adapting to the audience (16-19 y/o's and parents) and [graphic design profile](#) of the organization. Came up with phrases to connect VO to our vision for the campaign: broadening understanding of the education and career possibilities after the programme.

(*En del av något större* - Part of something bigger; *En grund som öppnar tusen möjligheter* - A foundation that opens a thousand possibilities)

Results: Created three social media post examples, aligning with goals set in the communication plan.
